

Tube Mounted Centrifugal Roof Exhaust Fan

Application:

- Tube mounted roof exhaust fan that is suitable for high airflow and low noise level requirements.

Design:

- Galvanised steel tube and cowl that can be painted upon request. All units come standard with a roof flashing for steel roofs and mounting brackets. Flashings are available for tiled roofs.

Motor:

- External rotor motor, 240V single phase only. Motors are speed controllable.

Protection:

- IP54 with integral thermal protection.

Impellers:

- High efficiency backward curved impeller.
